TL;DR:

Over a decade of experience as a **software engineer,** especially **full stack developer, and Team leader**. A great team player, love to take challenges and think broadly about any project I'm working on.

Professional knowledge and development tools

Team lead • Tech lead Project • Hardware integration • Agile • Jira
JavaScript • TypeScript • React • Vue.js • Angular.js • NodeJS • Redux • RXJX • REST • AWS • Firebase • MongoDB • GIT • CSS • HTML5 • SQL • RESTFull • Postgres • Linux • NestJS • PostgreSQL • Cordova • Ionic • Docker • QA • Java • C# • Micro-services • Android Studio

2023 - Until now: Fullstack developer @ Tigo Energy
Developed and maintained software solutions for solar systems, designed scalable backend systems with **PHP and NestJS**, integrating complex **SQL** queries using **PostgreSQL**. Created front-end components and mobile applications with **Vue, Cordova, Ionic**, and **TypeScript**. **Managed API integration** with solar equipment, optimizing data accuracy and reliability and adhering to a**gile methodologies**.

2020 - 2023: Fullstack developer @ Checkpoint
As part of a development team, developed a web application XDR/ EPR Cyber Security Attack, for sysadmin usage. Creating backend microservices using **NodeJS and Express** with **MVC** architecture one for auth Api and a second for Api Data fetching, handling big data using **MongoDB** and **MySql DB.** Creating application screens and components using **React and TypeScript.** Maintain ci cd processes using **Cloudinfra** cloud solutions.

2018-2020: Fullstack developer @ Appnext
Development of marketing applications, game portals, and TOP10 sites on CMS using **React** and **NodeJS**

2012-2018: Team Leader, Owner @ My private business
Owned and **managed a business** specializing in web development, delivering customized website and application solutions from product conceptualization to production. leading around 5 people, UI/UX designers and programmers. Used a vast technology stack such as **React, NodeJS, PHP, MySQL,** and **MongoDB.** I implemented **Scrum methodologies**, managed sprints with **Monday.com**, and ensured project delivery within tight deadlines.

2012-2014: Software engineer @ Unitask
Developing a pharmaceutical project management system Web application for TEVA using **Visual Force and APEX**

Educational and General:
2019-2020: Full stack curriculum @ Coding academy
Military Service: 2000-2003: 3D animator @ IDF - Air Force
High school: 'Ora Modiim' the trend of computers, a full matriculation certificate.
Languages: Hebrew - mother tongue, English - excellent**.**
